Table of Contents

Preface	ix
Acknowledgments	xv
 Chapter 1. Numerical Basics	 1
Introduction	1
Simple Vector Operations	1
Simple Matrix Operations	3
Numerical Integration of Differential Equations	13
Noise and Random Variables	19
Gaussian Noise Example	23
Calculating Standard Deviation	26
White Noise	28
Simulating White Noise	30
State-Space Notation	33
Fundamental Matrix	34
Summary	38
References	38
 Chapter 2. Method of Least Squares	 41
Introduction	41
Overview	41
Zeroth-Order or One-State Filter	42
First-Order or Two-State Filter	46
Second-Order or Three-State Least-Squares Filter	50
Third-Order System	56
Experiments with Zeroth-Order or One-State Filter	59
Experiments with First-Order or Two-State Filter	64
Experiments with Second-Order or Three-State Filter	71
Comparison of Filters	78
Accelerometer Testing Example	80
Summary	89
References	90
 Chapter 3. Recursive Least-Squares Filtering	 91
Introduction	91
Making Zeroth-Order Least-Squares Filter Recursive	91
Properties of Zeroth-Order or One-State Filter	93
Properties of First-Order or Two-State Filter	103
Properties of Second-Order or Three-State Filter	112
Summary	124
References	128

Chapter 4.	Polynomial Kalman Filters	129
	Introduction	129
	General Equations	129
	Derivation of Scalar Riccati Equations	131
	Polynomial Kalman Filter (Zero Process Noise)	134
	Comparing Zeroth-Order Recursive Least-Squares and Kalman Filters	136
	Comparing First-Order Recursive Least-Squares and Kalman Filters	139
	Comparing Second-Order Recursive Least-Squares and Kalman Filters	142
	Comparing Different-Order Filters	148
	Initial Covariance Matrix	151
	Riccati Equations with Process Noise	155
	Example of Kalman Filter Tracking a Falling Object	159
	Revisiting Accelerometer Testing Example	171
	Summary	179
	References	182
Chapter 5.	Kalman Filters in a Nonpolynomial World	183
	Introduction	183
	Polynomial Kalman Filter and Sinusoidal Measurement	183
	Sinusoidal Kalman Filter and Sinusoidal Measurement	194
	Suspension System Example	203
	Kalman Filter for Suspension System	207
	Summary	218
	References	218
Chapter 6.	Continuous Polynomial Kalman Filter	219
	Introduction	219
	Theoretical Equations	219
	Zeroth-Order or One-State Continuous Polynomial Kalman Filter	221
	First-Order or Two-State Continuous Polynomial Kalman Filter	227
	Second-Order or Three-State Continuous Polynomial Kalman Filter	232
	Transfer Function for Zeroth-Order Filter	238
	Transfer Function for First-Order Filter	243
	Transfer Function for Second-Order Filter	248
	Filter Comparison	251
	Summary	255
	References	255
Chapter 7.	Extended Kalman Filtering	257
	Introduction	257
	Theoretical Equations	257

Drag Acting on Falling Object	259
First Attempt at Extended Kalman Filter	261
Second Attempt at Extended Kalman Filter	274
Third Attempt at Extended Kalman Filter	284
Summary	291
References	291

Chapter 8. Drag and Falling Object	293
Introduction	293
Problem Setup	293
Changing Filter States	309
Why Process Noise Is Required	311
Linear Polynomial Kalman Filter	320
Summary	329
References	329

Chapter 9. Cannon-Launched Projectile Tracking Problem	331
Introduction	331
Problem Statement	331
Extended Cartesian Kalman Filter	334
Polar Coordinate System	349
Extended Polar Kalman Filter	354
Using Linear Decoupled Polynomial Kalman Filters	367
Using Linear Coupled Polynomial Kalman Filters	376
Robustness Comparison of Extended and Linear Coupled Kalman Filters	385
Summary	393
Reference	394

Chapter 10. Tracking a Sine Wave	395
Introduction	395
Extended Kalman Filter	395
Two-State Extended Kalman Filter with a Priori Information	408
Alternate Extended Kalman Filter for Sinusoidal Signal	417
Another Extended Kalman Filter for Sinusoidal Model	431
Summary	441
References	441

Chapter 11. Satellite Navigation	443
Introduction	443
Problem with Perfect Range Measurements	443
Estimation Without Filtering	447
Linear Filtering of Range	453
Using Extended Kalman Filtering	455
Using Extended Kalman Filtering with One Satellite	465
Using Extended Kalman Filtering with Constant Velocity Receiver	474

	Single Satellite with Constant Velocity Receiver	479
	Using Extended Kalman Filtering with Variable Velocity Receiver	493
	Variable Velocity Receiver and Single Satellite	505
	Summary.	513
	References	513
Chapter 12.	Biases	515
	Introduction	515
	Influence of Bias	515
	Estimating Satellite Bias with Known Receiver Location	519
	Estimating Receiver Bias with Unknown Receiver Location and Two Satellites	525
	Estimating Receiver Bias with Unknown Receiver Location and Three Satellites	533
	Summary.	544
	Reference	547
Chapter 13.	Linearized Kalman Filtering	549
	Introduction	549
	Theoretical Equations	549
	Falling Object Revisited.	552
	Developing a Linearized Kalman Filter.	556
	Cannon-Launched Projectile Revisited	569
	Linearized Cartesian Kalman Filter	570
	Summary.	583
	References	585
Chapter 14.	Miscellaneous Topics	587
	Introduction	587
	Sinusoidal Kalman Filter and Signal-to-Noise Ratio	587
	When Only a Few Measurements Are Available	595
	Detecting Filter Divergence in the Real World	606
	Observability Example	618
	Aiding	629
	Summary.	642
	References	646
Appendix	Fundamentals of Kalman-Filtering Software.	647
	Software Details	647
	MATLAB®	648
	True BASIC.	654
	Reference	662
